

PRECIOUS ANGELS

HIGH CARE COMMUNITY CENTRE

WHAT'S INSIDE	<ul style="list-style-type: none">• Information about The Castle and our activities.
--------------------------	--

Getting Started

Welcome to Precious Angels! We are pleased to have you join us for activities at The Castle, and we hope you enjoy what we have in store. Our day centre, The Castle, is designed to offer your child structure and consistency, with a focus on your NDIS Goal outcomes.

We've showcased some of our regular activities below. Being able to choose what activities you want can help to empower individuals and focus their interests. It can also help to develop stronger connections with peers while doing activities that interest and enrich your child.

At The Castle, we have a *Person Centred Approach* which includes a focus on the Sensory Stimulation Framework. By engaging your child's senses in our activities we aim to encourage experimentation in a safe environment to help achieve NDIS Goals.

Our Culture

We've enhanced the Program Catalogue to help you pinpoint activities aligning with child's goals. Each activity now features icons indicating its core objectives, allowing you to quickly identify its purpose. While some activities may contribute to more than three goals, only the primary three are displayed. Refer to the provided list for clarification on the goal represented by each icon

Activity Key

Icon	Goal
 A simple line drawing of a stick figure standing with its arms raised, holding two dumbbells, representing physical activity.	Improve physical health & wellbeing
 A line drawing of a human head in profile, facing right. Inside the head is a heart shape, and there are three small stars around the head, representing emotional health.	Improve emotional health & wellbeing
 A line drawing of two stick figures standing side-by-side, with their right hands raised and touching in a high-five gesture, representing social interaction.	Develop social skills & understanding
 A line drawing of a hand with the index finger pointing to the right, representing fine motor skills.	Improve fine motor skills
 A collection of four simple line drawings representing sensory organs: a nose, an ear, an eye, and a mouth with lips.	Sensory Experience/Exploration
 A line drawing of a human head in profile, facing right. Three curved lines emanate from the mouth area, representing sound waves or communication.	Improve communication skills

	Integrate/Participate in the local community
	Daily Living Skills
	Facilitating Comprehension
	Build Independence
